GREAT OFFER ON HUNTER PRO-C CONTROLLERS AND MODULES

From April 26th until July 25th, 2003, you can take advantage of an outstanding offer at Aqua-Flo Supply. Just purchase a Hunter PC-300 Outdoor or PC-300i Indoor 3-Station Clock and get a PCM-300 3-Station Module (a \$39 retail value) free! The Pro-C is a flexible and reliable controller that can be expanded to a total of 15 stations. It also features non-volatile memory, global water adjustment capability, built-in rain sensor circuit, and it is compatible with all Hunter remote control units.

POND SALES TAKING OFF!

As we have mentioned in earlier newsletters, Aqua-Flo is stocking the materials needed to install professional grade ponds and water features. What was unexpected was the pent-up demand for these products by our customers and by property owners. As this portion of our industry continues to grow rapidly so does the depth and breadth of our inventory. We stock complete pond kits that make it easy for the first-time installer to have all the products with you when you leave the store. Or you can buy any of the pumps, filters, skimmers, waterfalls, liner, valves, lights, seam kits, and accessories individually. Unlike other pond supply sellers located in a different part of the state or a different part of the country, your local Aqua-Flo branch is right nearby.

C.S.U.C.I. GOES WITH WEATHERMATIC/ VALCON CENTRAL CONTROL SYSTEM

Cal State University Channel Islands in Camarillo has successfully installed the Weathermatic/Valcon Central Control system at this newly-renovated campus. They are using the latest version of the Weathermatic Wetware software, a brand new weather station, and so far have installed nine satellite clocks with master valves and flow sensors around the campus. By linking the valve run times automatically with ET information gathered by the weather station, the system irrigates for the optimal amount of time for each zone. Tom Raden, Aqua-Flo's Central Controls Manager, helped oversee the installation. Tim Berndtson, Grounds Maintenance Supervisor at CSUCI is pleased with the Weathermatic/Valcon system and the resulting savings in water and labor. He adds, "The Weathermatic/Valcon system has all of the functionality that anyone would need, it's user-friendly, and it is a better value than competing central control systems." For more information on the Weathermatic/Valcon Central Control system, contact your local branch manager, who can put you in touch with an Aqua-Flo Central Controls specialist.
